

Above Ground Vinyl Liners

All Integrity liners are available in the following beads –

EZ-Bead

J-Bead

E W Bead

Standard Bead

INTEGRITY AG LADDER

*Strong, stable & the most versatile
above-ground pool ladder ever offered.*

**The Integrity AG Ladder is built on experience –
over 45 years of it. For maximum family
enjoyment, we didn't skip a step.**

"Deck-To-Pool"

*"A" Frame Design
Available in white and gray.*

USE THE STRONGEST MATERIALS *The Integrity AG Ladder is molded of rugged, high-impact resistant thermoplastic. It resists pool chemicals, and contains UV inhibitors – for years of safe, carefree use.*

EASY-CLIMBING STEPS *The Integrity AG Ladder has five steps – rather than the typical four. We set the first tread low, and the others just over 10" apart. Result: easier climbing, particularly for kids and seniors.*

ANTI-SLIP TREADS *We mold in texture – rather than glue it on. The result: superior, permanent traction on both steps and deck.*

BUILT-IN VERSATILITY *Adjustable to three pool heights: 48", 52" and 54". The A-frame ladder is convertible to deck-to-pool or stand-alone. And on the A-frame, there is a removable, portable outside ladder.*

NO COMPROMISE ON QUALITY OR SAFETY *The Integrity AG Ladder is designed according to the **NEW ANSI-NSPI supplemental standards effective December 31, 2004.** The new Integrity AG ladder was designed with enhanced features and manufactured under the International ISO 9001:2000 Quality Standard.*

*Integrity AG Ladder weight limit 300 lbs.
Exceeds NSPI standards*

5 Year Warranty
